## Algebra: Variables and Expressions <br> (6.EE.A. 2 and 5.OA.1)

Name: $\qquad$ Date: $\qquad$

## Directions:

## Evaluate expression (1) by substituting the given values for n :

Joe wants to buy some new apps which cost $\$ .99$ each plus tax, which is at a rate of $8 \%$. He also wants to purchase a $\$ 5.00$ gift card. Use the following expression to calculate how much money he will spend if $\mathrm{n}=$ the number of apps he purchases.

$$
\begin{equation*}
.99 n+5+[(.99 n+5) .08] \tag{1}
\end{equation*}
$$

1) $n=2$
2) $n=4$
3) $n=7$
4) $n=10$

## Algebra: Variables and Expressions

 (6.EE.A. 2 and 5.OA.1)Answer Key

1) $\$ 7.54$
2) $\$ 9.68$
3) $\$ 12.88$
4) $\$ 16.09$
