## Comparing Fractions with Different Denominators Word Problems <br> (4.NF.2)

Directions: Solve the following word problem using numbers, pictures (model drawings), and words. ©)
Nicola made dessert bars for her family. She used two same sized pans. They ate $1 / 4$ of the first pan and $1 / 5$ of the second pan. Shade in the models below and determine which dessert pan had more eaten. Explain whether or not you can compare the pans and amounts eaten.

## First Dessert Pan

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

## Second Dessert Pan

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

## Explain your thinking:

Name $\qquad$

Date $\qquad$

## KEY

First Dessert Pan 1/4 eaten

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

Second Dessert Pan $1 / 5$ eaten

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

When comparing using the same whole amounts, $1 / 4$ is a larger amount than $1 / 5$. $1 / 4>1 / 5$ Both dessert pans contained 40 same sized pieces. Both pans were identical. In the first dessert pan, 10 pieces were eaten. In the second pan, 8 were eaten. $10>8$
